CLINIC POLICIES

***Priority will be given to clients who are required to be seen according to state and federal guidelines.** Ability to provide service to clients who do not fall into these guidelines will be limited. The GCHD strongly recommends that you contact your child's health care provider regarding availability and administration of immunizations. This will ensure that your child is up to date on his or her immunizations and prevent exclusion from schools and childcare centers in the community.

***Clients must bring: proof of insurance eligibility and shot record.**

***Children under the age of 18 must be accompanied by a parent or legal guardian.**
